To,
**The Hiring Manager**
[Company Name]

**Subject: Application for the Position of Software Developer / Software Engineer (Entry-Level)**

Dear Hiring Manager,

I am writing to express my interest in the entry-level Software Developer position at your organization. I recently completed my Bachelor of Technology in Computer Science & Engineering from VNS Group of Institutions, Bhopal (RGPV), with a CGPA of 7.79, and I am eager to begin my career with a reputed service-based IT company where I can apply my technical skills and contribute to real-world projects.

During my academic journey, I have built a strong foundation in Java, Spring Boot, REST API development, SQL, and MySQL, along with hands-on experience in Object-Oriented Programming and Data Structures & Algorithms. I have worked on projects such as a Student Management System using HTML, CSS, JavaScript and Bootstrap, and a REST API application built with Java and Spring Boot connected to a MySQL database — both of which helped me develop practical problem-solving and development skills. I am also comfortable working with Git/GitHub for version control and tools such as Postman, IntelliJ IDEA, and Eclipse.

I am a quick learner, detail-oriented, and enjoy working in collaborative environments. I have completed additional certifications in Python and Power BI to keep expanding my technical skill set, and I am confident in my ability to adapt to new technologies and deliver quality work as part of a team. I would welcome the opportunity to bring my dedication and technical knowledge to your organization and grow as a professional under your guidance.

I have attached my resume for your reference and would be grateful for the opportunity to discuss how I can contribute to your team. Thank you for considering my application. I look forward to hearing from you.

Sincerely,
**Liladhar Kumar**
